

## LEAD TESTING 2017

Folsom Elementary School is committed to protecting Folsom School the health of Folsom students and staff. As required by the Department of Education regulations, all drinking water outlets in our facility must be sampled for lead.

Folsom School has completed the lead drinking water sampling, and we are happy to announce our results.

Following instructions given in technical guidance developed by the New Jersey Department of Environmental Protection, we completed a plumbing profile for our school building. Through this effort, we identified and tested all drinking water and food preparation outlets. Of the 19 samples taken, ALL tested below the lead action level established by the US Environmental Protection Agency for lead in drinking water (15  $\mu\text{g}/\text{l}$  [ppb]).
